

Automatic External Defibrillator

Description

An automatic external defibrillator (AED) is capable of monitoring cardiac rhythms, detecting dysrhythmias and delivering a shock to the heart when appropriate without user decision making.

Policy

An automatic external defibrillator (AED) is considered **reasonable and necessary** when a member meets coverage criteria.

Policy Guidelines

Medicare Member Coverage Criteria:

Refer to Medicare's medical policy (L33690) and policy article (A52458) for coverage criteria.

Non-Medicare Member Coverage Criteria:

Coverage Criteria:

- 1. Must be ordered by the member's treating practitioner.
- 2. Automatic external defibrillators are covered for members at high risk for sudden cardiac death (SCD) due to one of the conditions described under (a) or (b). It is expected the treating practitioner be experienced in the management of members at risk for SCD.
 - a. A wearable defibrillator (K0606) is covered for members if they meet one of the criteria (i-iv), described below,
 - i. A documented episode of ventricular fibrillation or a sustained, lasting 30 seconds or longer, ventricular tachyarrhythmia. These dysrhythmias may be either spontaneous or induced during an electrophysiologic (EP) study, but may not be due to a transient or reversible cause and not occur during the first 48 hours of an acute myocardial infarction; or
 - ii. Familial or inherited conditions with a high risk of lifethreatening ventricular tachyarrhythmia such as long QT syndrome or hypertrophic cardiomyopathy; or

Automatic External Defibrillator

- iii. Either documented prior myocardial infarction or dilated cardiomyopathy and a measured left ventricular ejection fraction less than or equal to 0.35; or
- iv. A previously implanted defibrillator now requires explantation.

Reference Diagnosis Codes that Support Medical Necessity section for applicable diagnoses.

- b. A **non-wearable** automatic defibrillator (E0617) is covered for Members in two circumstances. They meet either (1) both criteria (i) and (ii) or (2) criteria (iii), described below,
 - i. The Member has one of the following conditions (1-8),
 - 1. A documented episode of cardiac arrest due to ventricular fibrillation, not due to a transient or reversible cause.
 - 2. A sustained, lasting 30 seconds or longer, ventricular tachyarrhythmia, either spontaneous or induced during an electrophysiologic (EP) study, not associated with acute myocardial infarction, and not due to a transient or reversible cause.
 - 3. Familial or inherited conditions with a high risk of lifethreatening ventricular tachyarrythmias such as long QT syndrome or hypertrophic cardiomyopathy.
 - 4. Coronary artery disease with a documented prior myocardial infarction, with a measured left ventricular ejection fraction less than or equal to 0.35, and inducible, sustained ventricular tachycardia (VT) or ventricular fibrillation (VF) during an EP study. To meet this criterion;
 - a. The myocardial infarction must have occurred more than 4 weeks prior to the external defibrillator prescription/standard written order (SWO); and,
 - b. The EP test must have been performed more than 4 weeks after the qualifying myocardial infarction.
 - 5. Documented prior myocardial infarction and a measured left ventricular ejection fraction less than or equal to 0.30. Members must not have:

Automatic External Defibrillator

- a. Cardiogenic shock or symptomatic hypotension while in a stable baseline rhythm; or
- b. Had a coronary artery bypass graft (CABG) or percutaneous transluminal coronary angioplasty (PTCA) within past 3 months; or
- c. Had an enzyme-positive MI within past month; or
- d. Clinical symptoms or findings that would make them a candidate for coronary revascularization; or
- e. Irreversible brain damage from preexisting cerebral disease; or
- f. Any disease, other than cardiac disease (e.g., cancer, uremia, liver failure), associated with a likelihood of survival less than one year.
- 6. Members with ischemic dilated cardiomyopathy (IDCM), documented prior myocardial infarction (MI), New York Heart Association (NYHA) Class II and III heart failure, and measured left ventricular ejection fraction (LVEF) ≤ 35%.
- 7. Members with nonischemic dilated cardiomyopathy (NIDCM) > 3 months, NYHA Class II and III heart failure, and measured LVEF ≤ 35%.
- 8. Members who meet one of the previous criteria (1-7) and have NYHA Class IV heart failure.
- ii. Implantation surgery is contraindicated.
- iii. A previously implanted defibrillator now requires explantation.

Reference Diagnosis Codes that Support Medical Necessity section for applicable diagnoses.

Limitations:

- 1. Claims for defibrillators for other indications will be denied as not reasonable and necessary.
- 2. Repair of a vest cardioverter is limited to restoration of a serviceable condition which is not the result of misuse, non-intentional or intentional.
- 3. The replacement of a patient-owned vest cardioverter is covered if any of the following criteria is met:

Automatic External Defibrillator

- a. When necessitated by irreparable damage not due to misuse, intentional or non-intentional
- b. The cost of repairs would exceed the purchase price

Exclusions:

1. The efficacy of the devices has not been proven when used for diagnoses other than those listed below and will not be covered.

Definitions

- 1. Myocardial infarctions are defined by elevated cardiac enzymes or Q-waves on an electrocardiogram.
- 2. Ejection fractions must be measured by angiography, radionuclide scanning, or echocardiography.
- 3. Transient or reversible causes include conditions such as drug toxicity, severe hypoxia, acidosis, hypokalemia, hypercalcemia, hyperkalemia, systemic infections, and myocarditis (not all-inclusive).

Documentation Requirements

Items in this policy may be subject to the Affordable Care Act (ACA) 6407 requirements.

The Affordable Care Act (ACA) 6407 requires that the treating physician conduct a face-to-face examination during the six month period preceding the written order. The documentation must be received by the provider prior to

Automatic External Defibrillator

delivery for certain DME items. The documentation must describe a medical condition for which the DME is being prescribed.

Coding Guidelines

- 1. Automatic defibrillators are devices that are capable of monitoring cardiac rhythms, detecting dysrhythmias, and delivering a defibrillation shock to the heart when appropriate without any user decision-making.
- 2. Non-wearable, automatic external defibrillators with integrated electrocardiogram capability are coded using HCPCS code E0617.
- 3. Wearable, automatic, external defibrillators with integrated electrocardiogram analysis are coded using HCPCS code K0606.
- 4. Other types of defibrillators are coded as A9270. No separate payment is made for carrying cases or mounting hardware.
- 5. Replacement supplies and accessories for use with K0606 are coded using K0607 K0609 as appropriate.
- 6. Replacement supplies and accessories for use with K0617 are coded using A9999.

HCPCS MODIFIERS (If Applicable):

- EY- No physician or other health care provider order for this item or service
- GA Waiver of liability statement on file
- GZ Item or service expected to be denied as not reasonable and necessary.
- KX Requirements specified in the medical policy have been met
- KX, GA, GZ Modifiers:

Suppliers must add a KX modifier to a code only if all of the criteria in the Indications and Limitations of Coverage and/or Medical Necessity section of this policy have been met.

Important Note:

Northwood's Medical Policies are developed to assist Northwood in administering plan benefits and determining whether a particular DMEPOS product or service is reasonable and necessary. Equipment that is used primarily and customarily for a non-medical purpose is not considered durable medical equipment.

Coverage determinations are made on a case-by-case basis and are subject to all of the terms, conditions, limitations, and exclusions of the member's contract including medical necessity requirements.

The conclusion that a DMEPOS product or service is reasonable and necessary does not constitute coverage. The member's contract defines which DMEPOS product or service is covered, excluded or limited. The policies provide for clearly written, reasonable and current criteria that have been approved by Northwood's Medical Director.

The clinical criteria and medical policies provide guidelines for determining the medical necessity for specific DMEPOS products or services. In all cases, final benefit determinations are based on the applicable contract language. To the extent there are any conflicts between medical policy guidelines and applicable contract language, the contract language prevails. Medical policy is not intended to override the policy that defines the member's benefits, nor is it intended to dictate to providers how to direct care. Northwood Medical policies shall not be interpreted to limit the benefits afforded to Medicare or Medicaid members by law and regulation.

Northwood's policies do not constitute medical advice. Northwood does not provide or recommend treatment to members. Members should consult with their treating practitioner in connection with diagnosis and treatment decisions.

Northwood follows all CMS National Coverage Determinations (NCD) and Local Coverage Determinations (LCD), as applicable.
