

Medical Policy

Pressure Gradient Garments and Support Stockings

Description

Pressure gradient garments and support stockings are designed to promote and restore normal fluid circulation to the extremities as well as to minimize excessive scarring responses in burn victims. The garments can vary from lymphedema sleeves for the arm, knee length to full-length stockings, waist high leotard, to various other body parts such as the hands.

Pressure gradient “compression” stockings are specialized hosiery that are tightest at the ankles and become less constrictive up the leg. They are used to help increase circulation, prevent the formation of blood clots, and treat ulcers of the lower legs. By compressing surface veins, arteries and muscles beneath the skin, arterial pressure is increased. The increased pressure leads to improved blood flow, decreased pooling of blood in the lower legs and feet, and decreased swelling.

Policy

Compression stockings are available in different pressure gradients. They require a prescription from the treating practitioner and require measurements for fitting. These stockings start at 20 mmHg compression and increase from there.

Standard gradient compression stockings are considered off-the-shelf and available in a range of sizes. Three to five measurements are taken of the member’s limb to determine the proper size stocking that meets the member's dimensions.

Custom-fitted gradient compression stockings are stockings that are made for members that do not fall into the standard dimensions of off-the-shelf stockings (standard compression garments have been tried and/or ruled out). This generally requires using a specialty tape measure that has measurements every inch and a half to ensure a custom fit for the member and is hand sewn by the manufacturer.

Policy Guidelines

Health New England Commercial Members	Refer to: Medicare (CMS) Surgical Dressings Local Coverage Determination (L33831) and related Policy Article (A54563) for coverage criteria and , Centers for Medicare & Medicaid Services (CMS’) Final Rule CMS-1780-F.
----------------------------------------------	-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

Medical Policy

Pressure Gradient Garments and Support Stockings

Medicare Member Coverage Criteria (including Commercial Plans that follow Medicare guidelines):

Refer to Medicare policy (**L33831**) and article (**A54563**) for coverage criteria **and** to the Centers for Medicare & Medicaid Services' (CMS') Final Rule CMS-1780-F.

Starting January 1, 2024, Medicare Part B covers gradient compression garments (standard and custom-fitted) for a diagnosis of **lymphedema** when the treating practitioner has prescribed them.

Gradient compression garments, related supplies and accessories are covered only for the treatment of lymphedema (see ICD-10-CM Codes that Support Medical Necessity below). Claims for gradient compression garments, related supplies and accessories for non-lymphedema diagnoses will be denied as noncovered.

A quantity of three (3) daytime garments or wraps per body area are allowed once every six (6) months.

A quantity of two (2) nighttime garments per body area are allowed once every two (2) years (24 months).

Replacement of the garments can only be made in accordance with the frequency limitations of once every six (6) months for daytime garments or wraps and once every two (2) years for nighttime garments.

ICD-10-CM Codes That Support Medical Necessity

Payment for lymphedema compression treatment items is limited to the ICD-10-CM codes of lymphedema listed below. The presence of an ICD-10-CM code listed in this section is not sufficient by itself to assure coverage.

Code	Description
I89.0	Lymphedema, not elsewhere classified
I97.2	Postmastectomy lymphedema syndrome
I97.89	Other postprocedural complications and disorders of the circulatory system, not elsewhere classified
Q82.0	Hereditary lymphedema

Medical Policy

Pressure Gradient Garments and Support Stockings

Non-Medicare Member Coverage Criteria:

Policy Guidelines for Commercial/NH Medicaid Members

Compression garments (e.g., support stocking/burn garment/gradient pressure garment/sleeve) that have a pressure of **18 mmHg-30 mmHg or more** (e.g., A6530 Gradient compression stocking, below knee, 18-30 mmHg, each), that require a treating practitioner's order (prescription) to be dispensed and require measurements for fitting are considered **medically necessary** for any of the following conditions:

- Lymphedema, including chronic lymphedema (lasting more than 3 months) and lymphedema as a physical complication of mastectomy
- DVT prophylaxis during pregnancy and postpartum
- Edema accompanying paraplegia, quadriplegia, etc.
- Edema following surgery, fracture, burns, or other trauma
- Orthostatic hypotension
- Phlebitis/Thrombophlebitis
- Post sclerotherapy
- Post-thrombotic syndrome (post-phlebotic syndrome)
- Postural hypotension
- Prevention of thrombosis in immobilized members (e.g., immobilization due to surgery, trauma, general debilitation, etc.)
- Severe circulatory disorder (*see below)
- Severe edema in pregnancy/high-risk pregnancy
- Significant burn with risk of post burn contracture, skin grafting and hypertrophic scarring.
- Treatment of complications of chronic venous insufficiency:
 - Lipodermatosclerosis
 - Stasis dermatitis (venous eczema)
 - Varicose veins (except spider veins)
 - Venous edema
 - Venous ulcers (stasis ulcers)

*A severe circulatory disorder is any disorder or condition that affects the circulatory system. Circulatory disorders can arise from problems with the heart, blood vessels or the blood itself. Disorders of the circulatory system generally result in diminished flow of blood and oxygen supply to the tissues. The heart and blood vessels make up the circulatory system. These conditions can include, **but are not limited to:**

Medical Policy

Pressure Gradient Garments and Support Stockings

- Coronary heart disease (CHD), stroke, hypertension, and congestive heart failure, ventricular arrhythmias, congenital cardiovascular disorders, rheumatic heart disease, peripheral artery disease, deep vein thrombosis, pulmonary embolism.
- Lymphedema or chronic venous insufficiency with the goal of preventing the onset or worsening of venous stasis ulcers.

Burn pressure garments are covered when medically necessary to enhance healing, reduce swelling, treat contractures and hypertrophic scars suffered by severely burned patients.

Non-elastic leg binders are considered reasonable and necessary for members who meet the selection criteria for pressure gradient support stockings listed above. Non-elastic leg binders are similar to graded compression stockings in that they provide static compression of the leg, but unlike graded compression stockings, they do not use elastic but use adjustable Velcro or buckle straps.

Limitations

Gradient Compression Stocking:

- No more than four (4) support garments per year, unless supported by specific state Medicaid/Health Plan limits.
- Additional support garments will be covered if the member's primary care physician determines they are required due to significant gain or loss in weight or change in the patient's condition.

Burn Garments:

- No limitations.

Exclusions

- Support garments are considered **not** reasonable and necessary for the prevention of stasis ulcers or for the prevention of the reoccurrence of stasis ulcers that have healed.
- Compression garments for the legs are considered experimental and investigational for the chest, labia, trunk or neck. There is a lack of peer-reviewed published literature evaluating the clinical utility of compression garments for these types of lymphedemas.
- Compression garments for the legs are considered experimental and investigational for improving functional performance in individuals with Parkinson's disease.

Medical Policy

Pressure Gradient Garments and Support Stockings

- Compression garments for the legs are considered experimental and investigational for management of delayed-onset muscle soreness.
- Compression garments for the treatment of Long COVID autonomic dysfunction.
- Prophylactic compression garments for the prevention of lower limb lymphedema after gynecological cancer treatment.
- Stockings purchased over the counter without a prescription which have a pressure of **less than 20 mm Hg** (e.g., elastic stockings, surgical leggings, anti-embolism stockings such as T.E.D. hose or pressure leotards) are considered experimental and investigational since they have not been proven to be effective in the treatment of the conditions listed in this policy or in preventing a thromboembolism. They are also not considered reasonable and necessary because they are not primarily medical in nature.

ICD-10 codes covered if selection criteria are met (not all inclusive):	
G81.00 - G81.94	Hemiplegia and hemiparesis
G82.20 - G83.9	Paraplegia (paraparesis), quadriplegia (quadriparesis) and other paralytic syndromes
I80.00-I80.209 I80.221-I80.3	Phlebitis and thrombophlebitis of superficial or deep vessels of lower extremities
I83.001 - I83.899	Varicose veins of lower extremities, with ulcer, with inflammation, with ulcer and inflammation, or with other complications
I87.00 - I87.099	Post thrombotic syndrome
I87.2	Venous insufficiency (chronic)(peripheral)
I89.0 - I89.9	Other noninfective disorders of lymphatic vessels and lymph nodes
I95.1	Orthostatic hypotension
I97.2	Postmastectomy lymphedema syndrome
I97.89	Other postprocedural complications and disorders of the circulatory system, not elsewhere classified
O12.00 - O12.05	Gestational edema
O22.00 -O22.03 O87.4	Varicose veins of lower extremity in pregnancy
O90.89	Other complications of the puerperium, not elsewhere classified [postpartum edema] [not covered for pain during post-natal care]
Q82.0	Hereditary lymphedema

Medical Policy

Pressure Gradient Garments and Support Stockings

R60.0 - R60.9	Edema, not elsewhere classified
Z74.01	Bed confinement status

Coding Guidelines

For the compression stocking codes A6531 and A6532, one unit of service is generally for one stocking. However, if a manufacturer has a product consisting of two components that are designed to be worn simultaneously on the same leg, the two components must be billed as one claim line with one unit of service (e.g., a product that consists of an unzipped liner and a zippered stocking).

The right (RT) and/or left (LT) modifiers must be used with codes A6531, A6532, A6545 for gradient compression stockings and wraps. When the same code for bilateral items (left and right) is billed on the same date of service, bill each item on two separate claim lines using the RT and LT modifiers and 1 unit of service (UOS) on each claim line. Claims billed without modifiers RT and/or LT will be rejected as incorrect coding.

HCPCS Level II Codes and Description

Medical Policy

Pressure Gradient Garments and Support Stockings

A4465	Non-elastic binder for extremity
A4490	Surgical stocking, above knee length, each
A4495	Surgical stocking, thigh length, each
A4500	Surgical stocking, below knee length, each
A4510	Surgical stocking, full length, each
A6501	Compression burn garment, bodysuit (head to foot), custom fabricated
A6502	Compression burn garment, chin strap, custom fabricated
A6503	Compression burn garment, facial hood, custom fabricated
A6504	Compression burn garment, glove to wrist, custom fabricated
A6505	Compression burn garment, glove to elbow, custom fabricated.
A6506	Compression burn garment, glove to axilla, custom fabricated
A6507	Compression burn garment, foot to knee length, custom fabricated
A6508	Compression burn garment, foot to thigh length, custom fabricated
A6509	Compression burn garment, upper trunk to waist including arm openings (vest), custom fabricated
A6510	Compression burn garment, trunk, including arms down to leg openings (leotard), custom fabricated
A6511	Compression burn garment, lower trunk including leg openings (panty), custom fabricated
A6512	Compression burn garment not otherwise classified
A6513	Compression burn mask, face and/or neck, plastic or equal, custom fabricated
A6520	Gradient compression garment, glove, padded, for nighttime use, each
A6521	Gradient compression garment, glove, padded, for nighttime use, custom, each
A6522	Gradient compression garment, arm, padded, for nighttime use, each
A6523	Gradient compression garment, arm, padded, for nighttime use, custom, each
A6524	Gradient compression garment, lower leg and foot, padded, for nighttime use, each
A6525	Gradient compression garment, lower leg and foot, padded, for nighttime use, custom, each
A6526	Gradient compression garment, full leg and foot, padded, for nighttime use, each
A6527	Gradient compression garment, full leg and foot, padded, for nighttime use, custom, each
A6528	Gradient compression garment, bra, for nighttime use, each
A6529	Gradient compression garment, bra, for nighttime use, custom, each
A6530	Gradient compression stocking, below knee, 18-30 mmHg, each
A6531	Gradient compression stocking, below knee, 30-40 mmHg, each used as a surgical dressing.

Medical Policy

Pressure Gradient Garments and Support Stockings

A6532	Gradient compression stocking, below knee, 40-50 mmHg, each, used as a surgical dressing.
A6533	Gradient compression stocking, thigh length, 18-30 mmHg, each
A6534	Gradient compression stocking, thigh length, 30-40 mmHg, each
A6535	Gradient compression stocking, thigh length, 40mmhg or greater, each
A6536	Gradient compression stocking, full length, chap style 18-30 mmHg, each
A6537	Gradient compression stocking, full length/chap style, 30-40 mmHg, each
A6538	Gradient compression stocking, full length/chap style, 40 mmHg or greater, each
A6539	Gradient compression stocking, waist length, 18-30 mmHg each
A6540	Gradient compression stocking, waist length, 30-40 mmHg, each
A6541	Gradient compression stocking, waist length, 40 mmHg or greater, each
A6542	Gradient compression stocking custom made
A6544	Gradient compression stocking, garter belt
A6545	Gradient compression wrap, non-elastic, below knee, 30-50 mmHg each, used as a surgical dressing.
A6549	Gradient compression stocking not otherwise specified
A6552	Gradient compression stocking, below knee, 30-40 mmHg, each (effective 1/1/24)
A6553	Gradient compression stocking, below knee, 30-40 mmHg, custom, each
A6554	Gradient compression stocking, below knee, 40 mmHg or greater, each (effective 1/1/24)
A6555	Gradient compression stocking, below knee, 40 mmHg or greater, custom, each
A6556	Gradient compression stocking, thigh length, 18-30 mmHg, custom, each
A6557	Gradient compression stocking, thigh length, 30-40 mmHg, custom, each
A6558	Gradient compression stocking, thigh length, 40 mmHg or greater, custom, each
A6559	Gradient compression stocking, full length/chap style, 18-30 mmHg, custom, each
A6560	Gradient compression stocking, full length/chap style, 30-40 mmHg, custom, each
A6561	Gradient compression stocking, full length/chap style, 40 mmHg or greater, custom, each
A6562	Gradient compression stocking, waist length, 18-30 mmHg, custom, each
A6563	Gradient compression stocking, waist length, 30-40 mmHg, custom, each
A6564	Gradient compression stocking, waist length, 40 mmHg or greater, custom, each
A6565	Gradient compression gauntlet, custom, each
A6566	Gradient compression garment, neck/head, each
A6567	Gradient compression garment, neck/head, custom, each
A6568	Gradient compression garment, torso and shoulder, each
A6569	Gradient compression garment, torso/shoulder, custom, each
A6570	Gradient compression garment, genital region, each
A6571	Gradient compression garment, genital region, custom, each
A6572	Gradient compression garment, toe caps, each
A6573	Gradient compression garment, toe caps, custom, each

Medical Policy

Pressure Gradient Garments and Support Stockings

A6574	Gradient compression arm sleeve and glove combination, custom, each
A6575	Gradient compression arm sleeve and glove combination, each
A6576	Gradient compression arm sleeve, custom, medium weight, each
A6577	Gradient compression arm sleeve, custom, heavy weight, each
A6578	Gradient compression arm sleeve, each
A6579	Gradient compression glove, custom, medium weight, each
A6580	Gradient compression glove, custom, heavy weight, each
A6581	Gradient compression glove, each
A6582	Gradient compression gauntlet, each
A6583	Gradient compression wrap with adjustable straps, below knee, 30-50 mmHg, each (effective 1/1/24)
A6584	Gradient compression wrap with adjustable straps, not otherwise specified
A6585	Gradient pressure wrap with adjustable straps, above knee, each
A6586	Gradient pressure wrap with adjustable straps, full leg, each
A6587	Gradient pressure wrap with adjustable straps, foot, each
A6588	Gradient pressure wrap with adjustable straps, arm, each
A6589	Gradient pressure wrap with adjustable straps, bra, each
A6593	Accessory for gradient compression garment or wrap with adjustable straps, not-otherwise specified
A6594	Gradient compression bandaging supply, bandage liner, lower extremity, any size or length, each
A6595	Gradient compression bandaging supply, bandage liner, upper extremity, any size or length, each
A6596	Gradient compression bandaging supply, conforming gauze, per linear yard, any width, each
A6597	Gradient compression bandage roll, elastic long stretch, per linear yard, any width, each
A6598	Gradient compression bandage roll, elastic medium stretch, per linear yard, any width, each
A6599	Gradient compression bandage roll, inelastic short stretch, per linear yard, any width, each
A6600	Gradient compression bandaging supply, high density foam sheet, per 250 square centimeters, each
A6601	Gradient compression bandaging supply, high density foam pad, any size or shape, each
A6602	Gradient compression bandaging supply, high density foam roll for bandage, per linear yard, any width, each
A6603	Gradient compression bandaging supply, low density channel foam sheet, per 250 square centimeters, each
A6604	Gradient compression bandaging supply, low density flat foam sheet, per 250 square centimeters, each

Medical Policy

Pressure Gradient Garments and Support Stockings

A6605	Gradient compression bandaging supply, padded foam, per linear yard, any width, each
A6606	Gradient compression bandaging supply, padded textile, per linear yard, any width, each
A6607	Gradient compression bandaging supply, tubular protective absorption layer, per linear yard, any width, each
A6608	Gradient compression bandaging supply, tubular protective absorption padded layer, per linear yard, any width, each
A6609	Gradient compression bandaging supply, not otherwise specified
A6610	Gradient compression stocking, below knee, 18-30 mmHg, custom, each
L8010	Breast prosthesis, mastectomy sleeve

Important Note:

Northwood's Medical Policies are developed to assist Northwood in administering plan benefits and determining whether a particular DMEPOS product or service is reasonable and necessary. Equipment that is used primarily and customarily for a non-medical purpose is not considered durable medical equipment.

Coverage determinations are made on a case-by-case basis and are subject to all of the terms, conditions, limitations, and exclusions of the member's contract including medical necessity requirements.

The conclusion that a DMEPOS product or service is reasonable and necessary does not constitute coverage. The member's contract defines which DMEPOS product or service is covered, excluded or limited. The policies provide for clearly written, reasonable and current criteria that have been approved by Northwood's Medical Director.

The clinical criteria and medical policies provide guidelines for determining the medical necessity for specific DMEPOS products or services. In all cases, final benefit determinations are based on the applicable contract language. To the extent there are any conflicts between medical policy guidelines and applicable contract language, the contract language prevails. Medical policy is not intended to override the policy that defines the member's benefits, nor is it intended to dictate to providers how to direct care. Northwood Medical policies shall not be interpreted to limit the benefits afforded to Medicare or Medicaid members by law and regulation.

Northwood reserves the right to amend all policies without notice to providers or members.

Medical Policy

Pressure Gradient Garments and Support Stockings

Northwood's policies do not constitute medical advice. Northwood does not provide or recommend treatment to members. Members should consult with their treating physician in connection with diagnosis and treatment decisions.

Northwood follows all CMS National coverage Determinations (NCD) and Local Coverage Determinations (LCD), as applicable.
